Addendum No. 01

File Reference Number: RFP 2025 101

Title: Rail and Tie Installation/Surfacing

RE: Clarifications/Questions

QUESTIONS/CLARIFICATIONS:

Item 1: Is it possible to submit a proposal only for Project A (Rail Installation) or only for Project B (Tie Installation / Surfacing), or must the proposal mandatorily cover all Deliverables?

Answer: No, ONTC advises that the proponent must submit a proposal for both Project A (Rail Installation) and Project B (Tie Installation/Surfacing).

Item 2: Instead of a 5 × 1-year contractual model, would ONTC consider a structure of 3 firm years + 2 optional years? This would allow the contractor to plan long-term investments (e.g., specialized equipment, boarding consist logistics) and could potentially reduce annual unit costs.

Answer: No, ONTC advises that it will retain the five (5) one (1) year contractual model.

Item 3: Could you please confirm the exact definition of “Standby Rate” in this RFP?

- a) Does it apply when no work has been performed during the day?
- b) Does it apply when work was performed but fewer than 8 hours were achieved?
- c) Can the Standby Rate apply in the event of a delay caused by ONTC (e.g., delayed track access)?

Answer: ONTC advises that the Standby Rate is to be used when ONTC causes a delay in the work, such as limited track availability (train delay). The proponent is to plan the workdays in naturally occurring work blocks. Any Standby Rate must be approved by ONTC prior to invoicing.

- a) If the work cannot be performed due to a delay caused by ONTC, the Standby Rate may apply. The proponent is to plan the workdays in naturally occurring work blocks. Any Standby Rate must be approved by ONTC prior to invoicing.
- b) When less than 8 hours of track time has been achieved in a 12-hour shift, the standby rate would apply. The difference between the largest number of hours of track time in two consecutive blocks, and 8 hours, may apply. The Contractor is to plan the workdays in naturally occurring work blocks. Any Standby Rate must be approved by ONTC prior to invoicing.

- c) If the delay has been documented to be caused by ONTC, the Standby Rate may apply. The difference between the largest number of hours of track time in two consecutive blocks, and 8 hours, may apply. The proponent is to plan the workdays in naturally occurring work blocks. Any Standby Rate must be approved by ONTC prior to invoicing.

Item 4: Is only one boarding consist intended to serve both Project A (Rail) and Project B (Ties/Surfacing), or is a separate consist allocated to each project? If a single boarding consist is used, does this mean that both activities must be executed in the same geographic area and during synchronized time periods?

Answer: ONTC advises that only one boarding car consist will be available. The proponent may choose which project would use the boarding car consist during the work season. Track time may not be available to have both projects in the same area. The proponent must choose which staff would be using the boarding car consists.

Item 5: Could you please confirm whether the following services are provided by ONTC or must be supplied by the contractor, given that they are not explicitly stated in the RFP?

- a) Locomotive engineer or qualified personnel to move the boarding consist
- b) Pilot vehicle / track guide for consist repositioning
- c) Track access permissions, dispatch coordination, and movement authority for the consist
- d) Signal flagging / track protection for consist operations

Answer:

- a) ONTC will provide a locomotive engineer and qualified personnel to move the boarding cars. The contractor will be responsible to ensure that interior appliances are ready for moving.
- b) ONTC will be responsible for moving the boarding cars, following the proper request as outlined in 3.1 (26) and 4.1 (16).
- c) ONTC will be responsible for moving the boarding cars, following the proper request as outlined in 3.1 (26) and 4.1 (16).
- d) ONTC will be responsible for moving the boarding cars, following the proper request as outlined in 3.1 (26) and 4.1 (16).

Item 6: Would it be possible to obtain the list of road crossings, including classification (public vs private) and, where applicable, information on gates, signals, asphalt surfaces, and utilities?

Answer: Yes. Please see attached Crossing List.

Item 7: Is the Track Mobile (Rail Positioner / Shuttle Wagon / Rail Cart) to be supplied by the contractor, or does ONTC provide such equipment?

Answer: ONTC advises that if required, the Track Mobile must be supplied by the proponent.

This Addendum hereby forms part of the RFP.

Regards,

Nicole Laplante
