Addendum No. 02

File Reference Number: RFP 2026 044

Title: Supply and Delivery of Passenger Seat Cushions and Covers

RE: Clarifications/Questions

QUESTIONS/CLARIFICATIONS:

Item 1: Would ONTC clarify whether test data is required for the following, as specified below, if proponents will be utilizing all three?

- Fabric covering shall be Trevira CS - GO Transit pattern two tone green (**no substitutions**)
- Headrest cover material shall be Uniroyal NaugaTrans Plus Clamshell (**no substitutions**)
- Headrest and seatback foam material Chestnut Ridge CR Safeguard **or acceptable equivalent offering as determined by ONTC/Metrolinx**
- Proposed Foam: Material composition, transit ratings regarding smoke and flame development, record of testing
- Proposed Fabric: Material composition, transit ratings regarding smoke and flame development, record of testing

Answer: ONTC advises that proponents are required to provide sufficient technical documentation to demonstrate compliance with the material requirements identified in the RFP. Where proponents are proposing the specified materials identified in the RFP (i.e., Trevira CS GO Transit pattern fabric, NaugaTrans Plus Clamshell headrest covering, and the specified foam products), existing OEM or manufacturer technical data sheets and available testing documentation may be relied upon to demonstrate compliance with the required transit ratings and fire performance requirements.

Where a proponent proposes an alternative or equivalent foam material, the proponent must provide supporting documentation demonstrating equivalency to the specified product, including material composition, applicable transit ratings, and testing records demonstrating compliance with the requirements of the RFP.

Proponents should provide a technical description of the materials and components proposed for use in the assembly, including the information requested under the "Proponent Offerings" section of the RFP. ONTC reserves the right to request additional clarification or supporting documentation during the evaluation process.

Item 2: Would ONTC clarify the following - **Section G(c) PRICE EVALUATION METHOD:**

(c) Unless otherwise indicated in the requested pricing information, rates quoted by the proponent must be all-inclusive and must include all labour and material costs, all travel and carriage costs, all insurance costs, all costs of delivery, all costs of installation and set-up, including any pre-delivery inspection charges, and all other overhead, including any fees or other charges required by law.

Answer: ONTC advises that **Section G(c) - Price Evaluation Method** is standard procurement language included in the RFP template and is intended solely to describe how pricing submissions will be evaluated. It does not alter, expand, or add to the Scope of Work, which contains the project requirements and deliverables. For all pricing requirements and submission instructions, proponents should refer to **Appendix D - Schedule of Prices**.

This Addendum hereby forms part of the RFP.
