Addendum No. 03

File Reference Number: RFP 2026 068

Title: Engineering Services for Cochrane Powerhouse Ventilation and Battery Storage

RE: Clarifications/Questions

This Addendum forms part of the solicitation documents and is to be read, interpreted, and coordinated with all other parts of the procurement documents.

The following amendment is hereby issued:

Item 1: Appendix B – RFP Particulars – Scope – Battery Storage and Usage

Could ONTC please clarify whether the current scope requires only a review and assessment of the available options, or the development of a design for exterior storage/installation?

Answer: ONTC confirms that the scope includes both the evaluation of exterior battery storage options and the development of a design for the recommended exterior storage solution. The Consultant shall assess feasible options, recommend a preferred code-compliant approach, and prepare the engineering design and specifications for the selected exterior battery storage installation.
