Addendum No. 01

File Reference Number: RFP 2026 089

Title: North Bay Station Backup Generator Project

RE: Clarifications/Questions

QUESTIONS/CLARIFICATIONS:

Item 1 : Would ONTC confirm the existing brand of the panel that requires the 2p 60A breaker?

Answer : ONTC advises that based on available information, the existing electrical panels appear to be Eaton and/or Federal Pioneer. The Contractor is responsible for field verification of the panel manufacturer, model, and breaker compatibility prior to supply and installation of the 2-pole, 60A breaker.

Item 2: Would ONTC confirm whether all distribution must be Cutler-Hammer, consistent with the existing installation on site.

Answer: ONTC will permit equivalent manufacturers for distribution equipment, provided all equipment complies with the tender specifications and applicable requirements.

Where a new breaker is installed in an existing panel, the breaker must be compatible with the existing panel and approved for use in that panel. The contractor shall verify the existing panel manufacturer, model, and breaker compatibility on site and submit the proposed equipment for review and approval of shop drawings by the consultants/Engineer of record where required.

Adjacent panels are not required to be from the same manufacturer, provided the specified technical requirements are met.

Item 3: Would ONTC consider extending the closing date / submission deadline by one week from Thursday, November 5, 2026 to Thursday, November 12, 2026?

Answer: Yes, ONTC will extend the closing date / submission deadline by one week. The new closing date / submission deadline will be **Thursday, November 12, 2026 at 2:00:00 PM EST**.
