Addendum No. 02

File Reference Number: RFP 2026 083

Title: Fabrication of High Pressure Laminate (HPL) Panels

RE: Clarifications/Questions

QUESTIONS/CLARIFICATIONS:

Item 1: Would ONTC advise if it would accept the three (3) required project references from the bidder's proposed manufacturer or fabrication subcontractor instead of the bidding entity, provided that these projects were completed within the last five years and that the manufacturer/subcontractor will perform the relevant fabrication work under this contract?

Answer: No. The project references required under Appendix B, Section F, Item 1.3 must be references for projects completed by the Bidder. References from manufacturers, suppliers, subcontractors, or other third parties will not be accepted as substitutions for the Bidder's required project references.

Item 2: Would ONTC confirm whether the ten (10) coach carsets containing ceiling, wall and equipment panels are included within the ninety-six (96) coach carsets? Please confirm how these quantities should be priced in order to avoid duplicating wall and equipment panels.

Answer: Yes. The ten (10) coach carsets containing ceiling, wall and equipment panels are included within the ninety-six (96) coach carsets identified in the RFP. Proponents shall price Schedule A as follows:

- Item 1 (Coach Car HPL Panel Package) shall include pricing for ninety-six (96) coach carsets excluding ceiling panels;
- Item 2 (Cab Car HPL Panel Package) shall include pricing for twenty-five (25) cab carsets excluding ceiling panels; and
- Item 3 (Complete Ceiling Panel Carset) shall include pricing for ten (10) complete coach ceiling panel carsets only.

Wall and equipment panels associated with the ten (10) ceiling panel carsets are already included in Item 1 and shall not be priced a second time under Item 3.

Item 3: Appendix B refers to a guaranteed amount of materials, while Section 3.1.8 states that work volume and value are not guaranteed. Please confirm the minimum quantities ONTC commits to purchasing.

Answer: The quantities identified in the RFP and Appendix E are provided for proposal evaluation and contract planning purposes and represent ONTC's anticipated requirements associated with the Metrolinx Bi-Level refurbishment program. However, pursuant to Section 3.1.8 of the RFP, ONTC does not guarantee any minimum quantity, value, or volume of work under the resulting Agreement. Proponents shall base their pricing on the quantities identified in Appendix E for evaluation purposes only.

Item 4: Would ONTC please provide the delivery address and any receiving or unloading requirements relevant to freight pricing?

Answer: Deliveries shall be made to ONTC's Remanufacturing and Repair Centre located in North Bay, Ontario. The successful Proponent will be provided with detailed delivery instructions, receiving hours, and delivery contact information following contract award. Proponents shall include all freight, packaging, transportation, and delivery costs in their pricing submissions in accordance with the RFP requirements. Delivery shall be made FOB Destination, with freight prepaid by the Proponent.

Item 5: Please confirm whether the contractor's scope includes installation or setup at ONTC's facility, as these costs are mentioned in the pricing instructions but are not expressly identified in the deliverables.

Answer: No. ONTC advises that the Deliverables under this RFP are limited to the fabrication, machining, packaging, and delivery of the HPL panels and related services described in the RFP. Installation of the panels at ONTC's facility is not included in the scope of work.

This Addendum hereby forms part of the RFP.
