Addendum No. 02

File Reference Number: RFQ 2026 058

Title: Purchase of Three (3) Rough Terrain Forklifts

RE: Clarifications/Questions

QUESTIONS:

Item 1: Can ONTC please provide a brief description of how these forklifts will be used in your application?

Answer: Moving skids and other materials within and outside our operational areas. The forklifts will be used outdoors in all weather conditions, including snow and mud, and for loading and unloading trucks.

Item 2: Would ONTC consider a traditional outdoor forklift with large pneumatic dual-drive tires in place of a 4x4 drivetrain?

Answer: No. The forklifts will be used outdoors approximately 90% of the time; therefore, a 4x4/rough-terrain unit is required.

Item 3: Would ONTC be willing to consider a 3-stage mast that reaches 15 feet and 90' mast lowered height?

Answer: No.

This Addendum hereby forms part of the RFQ.
