Addendum No. 03

File Reference Number: RFQ 2026 078

Title: Purchase of Twenty (20) Stop Blocks

RE: Clarifications/Questions

QUESTIONS:

Item 1: Additional Information to Appendix B – RFQ Particulars

Please note the following:

- The stop blocks will be used in railway yard applications at the end of track and are intended to secure rail equipment that has been brought to rest under normal operating conditions.
- The stop blocks are not intended to routinely absorb high-energy impacts
- The maximum operating speed within these areas is approximately 10 mph (16 km/h).
- The impact face height shall be suitable for the intended rail vehicle coupler and the proposed stop block design.
- Proposed stop blocks shall be compatible with the rail profiles identified in the RFQ and suitable for the intended end-of-track application.
- Respondents shall propose a bumping post that is appropriate for the intended application and complies with applicable industry standards and manufacturer requirements.

This Addendum hereby forms part of the RFQ.
