Addendum No. 01

File Reference Number: RFQ 2026 091

Title: Supply and Delivery of Railway Maintenance Tools and Equipment for New Fleet Vehicles

RE: Clarifications/Questions

QUESTIONS / CLARIFICATIONS:

Item 1: Would ONTC advise if pricing is to be firm for a period of three years?

Answer: No. ONTC advises that as detailed in Appendix E - Schedule of Prices, the pricing being requested under this RFQ applies to the initial equipment purchase identified in the Schedule of Prices. While the resulting Agreement will have a three (3) year term with optional extensions, any future purchases during the Agreement term are not subject to the pricing submitted in Appendix E. Future orders, if any, will be subject to mutual agreement between ONTC and the successful supplier regarding pricing, delivery schedules, and product availability. Therefore, respondents are not required to hold the pricing submitted with their quotation for the full three-year term.

Item 2: Would ONTC advise if respondents are expected to redline the equipment purchase agreement prior to knowing whether any business has been awarded to them?

Answer: No. ONTC advises that respondents are not required to provide redlined contract documents as part of their submission. If a respondent wishes to propose changes to the draft Agreement, they may do so using the "Compliance with Contract Documents" table included in Appendix A. This is optional. ONTC will review any proposed exceptions during the evaluation and contract finalization process and reserves the right to accept or reject proposed changes at its sole discretion.

Item 3: Would ONTC confirm the required hole diameter(s) and drilling depth for the Trakstar Hydralic Drill? Also, are specific drill bits or cutters required to be included with each unit?

Answer: ONTC has revised the pricing schedule for this RFQ. Please see attached revised Appendix E - Schedule of Prices (Addendum No. 01).

Item 4: Would ONTC confirm whether the quantities in Appendix E should be multiplied by four when preparing our pricing for the Section Truck tool packages, or whether the listed quantities represent the total requirement for all four trucks? Appendix B specifies four (4) complete Section Truck tool packages. However, the quantities listed in the Section Truck worksheet of Appendix E appear to represent only one package.

Answer: Yes, ONTC requires pricing for four (4) Section Trucks. Quantities in Appendix E - Schedule of prices have been revised to reflect the quantities required for four (4) Section Trucks. Please see attached revised Appendix E - Schedule of Prices (Addendum No. 01).

Item 5: Would ONTC confirm whether the rail shoe quantities are expressed as individual rail shoes or pairs? We would also appreciate confirmation of the required rail profiles to ensure compatibility with the proposed hydraulic rail drills.

Answer: ONTC confirms that the rail shoe quantities are expressed as pairs. The rail profiles are as follows: Rail Shoes 100 ARAA, Rail Shoes 115 AREA, Rail Shoes 90 ARA.

Item 6: The RFQ states that delivery is required by December 31, 2026, however the anticipated executed of the Agreement is December 18, 2026. Is ONTC willing to accept delivery of certain items after December 31st given the tight timeline and Christmas holidays?

Answer: ONTC advises that the RFQ currently requires all equipment to be delivered no later than December 31, 2026. Respondents should submit their quotation based on the delivery requirements stated in the RFQ and indicate their proposed lead times and delivery schedule within their technical proposal. If a respondent cannot meet the required delivery date, Appendix F provides an opportunity to identify an alternative delivery date for ONTC's consideration. At this time, ONTC cannot guarantee acceptance of deliveries beyond December 31, 2026, and any exceptions would be evaluated based on the circumstances and operational requirements.

The RFQ Documents have been revised and sections affected are noted below. The revised RFQ sections supersede all previous RFQ Document versions for the said documents.
